

PUBLIC NOTICE

Request for Proposals (RFP) 10-16-W

Arc Flash Hazard Analysis Study for the Wells Hydroelectric Project

Public Utility District No. 1 of Douglas County, Washington, (District) hereby gives notice that it is seeking the following professional services:

Proposals from nationally recognized independent consulting electrical engineering firms interested in assisting the District in calculating the arc flash hazards present at the Wells Hydroelectric Project.

Firms responding to this notice must be properly licensed. All responding firms must submit a letter of interest, a statement of qualifications, a list of related completed projects, no less than three references with telephone numbers, and a general brochure describing the firm's activities. After screening the materials received, the District may request interviews with selected firms.

Engineering firms desiring consideration may request further information regarding this proposal by contacting:

Daniel Stolp
Project Electrical Engineer
Wells Hydroelectric Project
28905 US Hwy 97
Pateros, WA 98846

Written proposals must arrive in the office of the Wells Dam Project Electrical Engineer by 5:00 p.m. Pacific Time, July 15, 2010.

Dated this 14th day of June, 2010.
